

This is a pay service that I gladly pay and depend on. I tried for years to support the local broadcast stations but their service is inadequate and even offensive. I listen to the radio to hear music, news, traffic and weather. Not to hear some dumb DJ making silly jokes. My daily commute has improved greatly because of the quality and frequency of the local weather and traffic broadcasts. This level of service is not available on any broadcast station in my local area. And I WILLINGLY PAY for the this service. If the FCC inhibits this service in any way I will exercise my right as a consumer and will bring legal action against the FCC.
